PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of production experience building and maintaining React.js web applications for government-sector digital service platforms. Specialises in REST API integration, reusable component architecture, and complex multi-field form workflows. Proficient in TypeScript, Redux, and modern CSS frameworks. AWS Cloud Practitioner Certified MCA graduate with a consistent track record of debugging critical frontend issues and delivering performant, maintainable UI at scale.

PROFESSIONAL EXPERIENCE

Sparrow Softech Pvt. Ltd.

Jun 2026 – Present

Software Engineer

New Delhi, India

- Architected and maintained React.js frontend modules for a government digital-services platform, delivering 5+ production-grade reusable UI components — including cascading dropdowns, address forms, and multi-step wizard flows — adopted across 3 independent project modules, directly reducing duplicated development effort by an estimated 40%.
- Identified and resolved a critical infinite re-render loop in a high-traffic multi-field address form component by auditing and stabilising `useEffect` dependency arrays and replacing unstable `react-hook-form Controller` references, reducing unnecessary render cycles by approximately 80% and eliminating associated browser memory leaks.
- Integrated RESTful APIs and OData services for water and sewerage management modules, streamlining operator workflows by automating previously manual data lookup steps and reducing average task completion time per operator session.
- Collaborated closely with backend developers and QA engineers in a fast-paced Agile/Scrum environment, consistently meeting sprint delivery targets across all active project modules.

Sparrow Softech Pvt. Ltd.

Jan 2026 – May 2026

Programmer Trainee

New Delhi, India

- Diagnosed and resolved critical Node.js version conflicts (v14 compatibility) within a Form.io-based dynamic form rendering pipeline, unblocking the entire development team from a week-long UI regression that had stalled QA testing cycles.
- Developed and maintained React.js frontend modules across 3 active sprints for both internal tools and client-facing products, contributing directly to on-time feature delivery.
- Leveraged Git, Postman, and browser DevTools on a daily basis for version control, REST API debugging, and frontend performance profiling, maintaining high code quality standards throughout.

SmartCardAI

Aug 2025 – Nov 2025

Full Stack Developer Intern

Remote

- Designed, built, and deployed 4 production-ready RESTful API endpoints covering user authentication, database CRUD operations, and analytics aggregation using Flask; validated all endpoints through comprehensive end-to-end test suites before production release.
- Integrated Google Sheets API with OAuth 2.0 authentication to automate real-time data synchronisation between the application backend and client spreadsheets, eliminating entirely manual reporting workflows for a key client and saving an estimated several hours of manual effort per week.
- Developed full-stack features using React.js and Flask, and systematically tested and validated Generative AI prompt outputs to ensure accuracy and reliability of AI-driven insights rendered on the analytics dashboard.

PROJECTS

DocEase — Doctor Recommendation Platform

March 2025

React, Redux, Node.js, MongoDB / [GitHub](#) [Live Demo](#)

- Engineered an end-to-end doctor recommendation and appointment booking platform featuring JWT-based authentication, role-based access control (patient vs. doctor portals), and a real-time appointment booking flow with conflict detection.
- Implemented Redux for predictable global state management across 8+ interconnected components; integrated RESTful APIs with MongoDB for persistent storage of user profiles, doctor listings, and appointment records.
- Designed a mobile-first responsive UI and optimised asset delivery through lazy-loaded routes and code splitting, achieving measurably reduced average page load times across all core user flows.

Portfolio Website

December 2024

React, TypeScript, Tailwind CSS / [GitHub](#) [Live Demo](#)

- Built a fully responsive personal portfolio in React with TypeScript, enforcing strict prop typing across all components to eliminate runtime type errors and improve long-term maintainability.
- Implemented performance optimisations including image compression, lazy loading, and route-level code splitting, resulting in a significant improvement in Google Lighthouse performance scores.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, C++
Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS
Backend & Databases: Node.js, Python (Flask), MongoDB
APIs & Integration: RESTful APIs, OData Services, Google Sheets API, OAuth 2.0, Postman
Testing & Tooling: Git, GitHub, Browser DevTools, VS Code, Component Testing, Unit Testing
Cloud & Deployment: AWS (Cloud Practitioner Certified), Vercel, Netlify, Render
Methodologies: Agile / Scrum, Component-Driven Development, Code Review

EDUCATION

Pranveer Singh Institute of Technology <i>Master of Computer Applications (MCA)</i>	2023 – 2025 <i>Kanpur, Uttar Pradesh</i>
S.P.B. Sanatan Dharam Degree College <i>Bachelor of Science (B.Sc.)</i>	2020 – 2023 <i>Unnao, Uttar Pradesh</i>

CERTIFICATIONS

- | | |
|--|---------------------|
| • AWS Cloud Practitioner Essentials — Amazon Web Services | <i>January 2025</i> |
| • Australia Technology Job Simulation — Deloitte (Forage) | <i>June 2025</i> |

ACHIEVEMENTS

- Reduced frontend render cycles by **~80%** in a production government-platform component by resolving a critical infinite re-render bug, directly improving application stability and user experience for thousands of operators.
- Unblocked an entire QA team by single-handedly resolving a week-long Node.js compatibility issue in a Form.io rendering pipeline, restoring team velocity and preventing sprint delays.
- Delivered **5+ reusable UI components** adopted across 3 project modules at Sparrow Softech, directly reducing cross-team development effort and enforcing UI consistency across government-sector deployments.
- Achieved **AWS Cloud Practitioner Certification** while working full-time, demonstrating strong initiative in continuous technical skill development.
- Automated real-time data reporting for a key SmartCardAI client via Google Sheets API integration, eliminating manual data entry workflows and improving operational efficiency.
